

- Analytical Thinking

● Collaboration and Communication

● Continuous Learning and Adaptability

● Attention to Quality and Detail

Work Experience

Full-stack Software Engineer

SunAlgo

California, USA (Remote)

Sept 2024 - Present

- Resolved critical bugs and issues in staging and production environments, ensuring seamless application performance and user satisfaction.
- Designed, developed, and deployed optimized and scalable features, significantly reducing the recurrence of bugs and enhancing product stability.
- Actively contributed to agile stand-up meetings by delivering insightful updates, innovative ideas, and actionable suggestions, driving productive discussions and better outcomes for the software product.
- Conducted thorough peer code reviews to uphold high standards of code quality, application robustness, and performance.
- Played a major role in the development and delivery of key application features, receiving positive feedback from management, stakeholders, and end-users for their functionality and impact.
- Monitored and managed application error tracking tools (e.g., Airbrake) to identify and resolve feature-breaking issues promptly, minimizing downtime and improving system reliability.

Full-stack Web Developer

Nathan Digital (Nathan & Nathan)

Dubai, UAE (Remote)

May 2023 - Sept 2024

- Systematically identified and implemented software requirements and features of a web application catering to freelancers seeking opportunities in Dubai, UAE, ensuring the product's reliability in alignment with user expectations.
- Delivered prompt resolutions to critical software issues escalated by support staffs of the web application tailored for freelancers, ensuring seamless functionality and user satisfaction.
- Enhanced team efficiency by actively proposing pertinent ideas encompassing software security, performance optimization, and user-friendly UI design. These contributions played a pivotal role in the ongoing maintenance and enhancement of the software.

Frontend Developer (Part-time)

Dealer Lion

New York, USA (Remote)

Nov 2022 - Apr 2023

- Developed and implemented user-facing modules and features of a web application tailored for automobile and car parts dealers.
- Demonstrated a strong teamwork by engaging more with the team through peer coding sessions, peer code reviews, and requirements gathering and analysis which allowed us to speed up our workflows.

Full-stack Developer

BCS Technology

Makati City PH (Remote)

Aug 2021 - May 2023

- Developed software requirements and features aligned with UI/UX design and rectified software defects of a prominent Philippine-based airline's risk management and fraud screening application.
- Diagnosed and resolved technical anomalies while optimizing the codebase of a web application utilized by a renowned insurance enterprise in the Philippines, ensuring the system's overall performance and reliability.
- Demonstrated strong teamwork abilities by engaging collaboratively to the team through peer code reviews, peer programming sessions, sprint planning, and sprint retrospectives.

IT Staff - Programmer

Bethany Hospital Incorporated

La Union PH

Nov 2019 - Aug 2021

- Skillfully debugged and restructured the pre-existing codebase of a comprehensive Human Resource Information System. Performed meticulous analysis and improvement to ensure heightened functionality and efficiency.
- Conceptualized, designed, and developed a Minimum Viable Product (MVP) for the hospital website, employing PHP CodeIgniter as the foundational framework.

Web Developer

Kidron Security & Investigation Agency

La Union PH

Jul 2019 - Nov 2019

- Designed, developed, and hosted a website which allowed them to gain more clients and build up an online presence.
